

# HIGH PERFORMING LEARNING NETWORK PROGRAM

## PROGRAM OVERVIEW

The High Performing Learning Network Program is built on evidence practices of the key elements to a High Performing Network underpinned by effective intentional collaboration throughout the network.

The best education systems in the world are highly networked. These systems have Principals who are well-connected to their peers through active partnerships and High Performing Learning Networks.

These networks have effective partnerships that have common understandings and evidence-based practices, they challenge potential barriers to learning and engagement and support health and wellbeing, while enabling deep learning and innovation.
